Accounts Assistant Role

Slipstream Engineering Design is growing and we are looking for people with brains, creativity and ambition. We now have an opening for a brilliant Accounts Assistant with a passion for problem solving.

The Accounts Assistant will work alongside the Financial Controller and the Directors to assist in the administration of the companies finances. This varied and challenging role requires a proactive mindset as well as the ability to communicate effectively. Duties will include, but not limited to, purchasing, credit control, goods in and goods out. Whilst a focus on accounting administration is expected, the role may also encompass elements of general administration as well as customer service and support to the engineering team.

As an Accounts Assistant, you'll have a keen eye for detail, love being organised and ideally will have experience working in a support/admin role for a busy, growing organisation. We'll expect you to hit the ground running and make a difference straight away. In return you'll be joining a young, dynamic and encouraging team where you'll be allowed to realise your potential.

Working at the forefront of Radio Frequency (RF) technology, Slipstream Engineering Design translates complex wireless challenges into manufacturable products that disrupt, lead and grow markets for our customers.

Slipstream Engineering Design is a design consultancy who work on a wide range of projects for many different customers, from WiFi routers operating in rural Africa to complex RF modules for modern Radar systems. With technical excellence at its heart, Slipstream Design is a place where people are valued and success is shared.

If you feel you've got what it takes to fulfil this exciting role and have the drive to grow with the business, please get in touch by sending a covering letter and CV to: info@slipstream-design.co.uk
